

How do you manage a **PLAYGROUND** of this size?

FES 251-
Recreation Resource Management
OSU Extended Campus

Every year, millions converge on our nation's *great outdoors*. Capitalizing on a diversity of landscapes and natural areas, they engage in an array of recreational activities: rock climbing, mountain biking, boating, backpacking, ATV riding, and so much more.

PROVIDE & PROTECT

So what goes into managing this vast outdoor playground?

How do we satisfy the high demand for outdoor recreation, while protecting the sanctity of our sacred outdoor landscapes?

This is what we explore in *FES 251-Recreation Resource Management*.

APPLY WHAT YOU LEARN

Students are connected to real-world recreation projects taking place in *Deschutes National Forest* (Oregon Cascades), *Siuslaw National Forest* (Oregon Coast), and *Oregon State Parks*. They are also made aware of internship and employment opportunities available through various natural resource management agencies.

Join us **Spring Term 2015** for **FES 251-Recreation Resource Management**.
